CALL ACCOUNTING.

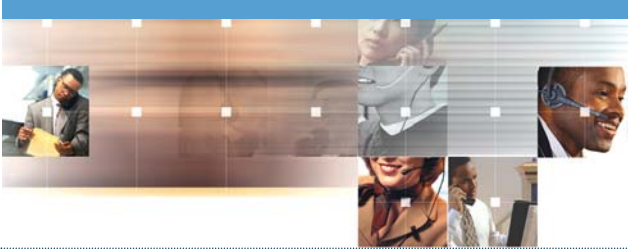

Designed for use with the VS1 Phone System

**Telephone Tracking
& Call Management Software**

Taking Control of your Telephone Network.

Real-Time Summary and ACD reporting

A Flexible and Cost-Effective Solution to Suit your Business Needs

VS Call Accounting is a fully scalable software package: it allows you to select the tools you need to suit the requirements of your business. Start with the **Summary SMDR Module**— then add on any of the **optional modules, such as Call Costing, ACD SMDR, or Live PBX Reporting**, for a personalized call accounting system. Select all modules for a full-featured system. Not only does this give you flexibility to build your own software package, but it also offers you an affordable solution since you're only purchasing the tools that are required for your application.

Easy to Use, Easy to Install

Windows®-based, VS Call Accounting provides a user-friendly GUI interface to make it easy for anyone to use. The software can be quickly installed on your PC.

Customizing your own Software Package with 4 Powerful Tools

The **Summary SMDR Module** generates detailed summary reports using attractive full-coloured graphs or in depth tables. Report Templates let you select the type of report you wish to view and Report Wizards let you decide which fields your summary reports will display. What's more is that VS Call Accounting offers you three advanced tools, each one uniquely designed to form a call accounting system that caters to the specific needs of your business. Choose any of the following:

Call Costing Module

Use this tool to simplify your monthly invoicing and cost allocation. The module automatically logs all telephone transactions, including incoming, outgoing, local, and long-distance calls. Call costs are calculated instantaneously and surcharges can be added depending on the type of call.

Why Your Business Needs VS Call Accounting

- ✓ **SAVE TIME**— Reports are generated in a matter of seconds. And with audio and visual alarms, the system does all the monitoring for you.
- ✓ **FLEXIBILITY**— Choose what data your reports will display.
- ✓ **RELIABILITY**— VS Call Accounting develops reports quickly and accurately.
- ✓ **SAVE MONEY**— Choose the tools that fit your business needs.

ACD Module

Improve efficiency in the workplace by using this tool to monitor and report employee productivity. Get statistics on call activity and processing time. The ability to select from Report Templates to view particular statistics as well as use Report Wizards to choose the fields to display, makes this module ideal for any business using a call center application.

Live PBX Reporting Module

Capture call activity in real-time. With this live PBX reporting module, you can instantly monitor all telephone usage. A call volume window displays the current call traffic status, including incoming and outgoing calls. Using the ACD group window, you can also monitor up to 10 ACD groups in real-time. This allows you to view the agents that are available, currently on calls, logged on or off, and more.
