

NURSE COURIER[®] 3 system

LISTED TO UL 1069 STANDARD!

The Nurse Courier 3 System now meets the standards for UL 1069, Hospital Signaling and Nurse Call Equipment, as tested by ETL Testing Laboratories.

With the UL 1069 Listing, a broader application pool is opened to the Nurse Courier 3 System, including general and critical care areas in hospitals, medical clinics, and skilled nursing areas, in accordance with the National Electrical Code, NFPA 70, and the Standard for Health Care Facilities, NFPA 99.

These new markets are an addition to the long-term care market that the Nurse Courier 3 has served, including retirement homes, assistive living facilities, and multi-level living facilities.

The approval translates into increased product credibility, higher end-user comfort and higher acceptance levels for the Nurse Courier 3 System.

Telecor's Nurse Courier 3 – UL-1069 listed for life safety dependability!
