DATE: March 2007

**SUBJECT:** T3-NC3 V1.x Firmware Release Notes

---

This document provides a release history of T3-NC3 Version 1.x Firmware.

### **T3-NC3 Version 1.0.2 Firmware**

#### **T3-NC3 Version 1.0.2 New Features:**

Daylight Saving Time now begins (springs forward 1 hour) on the second Sunday of March and ends (falls back 1 hour) on the first Sunday of November.

### **T3-NC3 Version 1.0.1 Firmware**

#### **T3-NC3 Version 1.0.1 Improvements:**

Improved System Reliably during Brown Out Conditions. During a brown out, the system detects this condition and adds an additional protection mechanism to safeguard system programming logic.

### **T3-NC3 Version 1.0 Firmware**

#### **T3-NC3 Version 1.0 Improvements:**

KRA paging continues the page until the user disconnects. Previously, KRA-initiated paging terminated after approximately two minutes.

The page call disconnects all paging points when the page is ended if during its connection there was another page call that tried to connect.

Nonessential system activity during network uploads has been suspended until the network upload is complete, improving network upload performance.

The T3-NC3 Controller will continue to function normally when it is transferring multiple call-ins from a remote telephone (KRA phone) to another Console.

Extra call-in time-out log messages are removed when a call-in is generated to a remote telephone (KRA phone), improving system performance.

Communication to the Console during system uploads has been suspended until the upload is complete, improving network upload performance.
